Your AI team, on your own Mac.

AI assistants for bookkeeping, sales, admin and support — running on a Mac in your office with **your company's own Claude account**. Your data stays with you. We install, monitor, update and support it.

What your team gets

Agents that do real work
Reconcile statements, chase invoices, answer customers, draft reports, prepare documents — configured for your processes.

Krew Desk
A private workspace on your Mac: chat with each agent, shared pages, approve drafts. Desktop and phone. Telegram/Slack optional.

Run for you
24/7 monitoring, signed overnight updates with automatic rollback, and a support agent that fixes common problems itself.

Security & data

- Agents, chats, files and memory stay on **your Mac**.
- You own the Claude account — we never hold its login.
- Our console sees **status only** (running, disk, updates) — never messages, files or prompts.
- Agents ask before sending email; can't make files public.
- Each role gets only the tools it needs; system files protected.
- Stop paying and it keeps running — no kill switch.

How it works

- **You provide** a Mac mini (Apple silicon, 16 GB) and a Claude Max or Team plan in your company's name.
- **We set it up remotely** in about half a day — nothing to install on your side: first 3 agents set up for your work, your staff logins, a 30-minute hand-over.
- **Your team works** with the agents in Krew Desk from day one.
- **We keep it healthy** and tune agents as you grow.

Pricing

Managed — most customers
USD 300 / month
+ USD 1,500 setup · up to 10 agents · monitoring, updates, support included

License — teams with their own IT
USD 4,000 one-time / Mac
+ USD 1,500 setup · USD 1,200 / year updates & support

Extra agent USD 150. Paid separately: the Mac mini (one-off) and your Claude plan (Max from USD 100/month ≈ 8 agents; USD 200/month ≈ 20 agents). Your AI cost is flat — no per-message bills.

Try it free for 14 days

Hosted in your browser today, or on your own Mac — we set it all up, you just use it.
